V.29

Jul - Dec, 1907

Index to ~~Volume 29~~

PROCEEDINGS

The American Society of Mechanical Engineers

A

PAGE

Air Cooling of Automobile Engines, J. WILKINSON.....1592 June 1907
ALDEN, G. I. (with J. R. BIBBINS), Duty Test on Gas Power Plant..... 477
ALEXANDER, M. W., disc. College and Apprentice Training..... 293
Analysis of Locomotive Test, S. A. REEVE.....1658
Automobiles, ball bearings for, HENRY HESS.....1786
Automobile engines, air cooling of, J. WILKINSON.....1592
Automobiles, material for, E. HAYNES.....1597
Auto steel, special, T. J. FAY.....1745

B

Balancing of Pumping Engines, A. F. NAGLE.....1448
Ball Bearings, HENRY HESS.....1786
BARRUS, GEORGE H., Experiences with Superheated Steam.....1457
BASFORD, GEORGE M., disc. College and Apprentice Training..... 302
Bench work, foundry for, W. J. KEEP and EMMET DWYER..... 229
BERRY, E. H., Patterns for Repetition Work..... 235
BIBBINS, J. R., Duty Test on Gas Power Plant..... 477
Blower, see also Foundry blower practice, W. B. SNOW..... 269
BOLE, WILLIAM A., Foundry Department and the Department of Engineering Design..... 21
BOLTON, REGINALD P., Superheat and Furnace Relations.....1587
disc. High Speed Elevators..... 680

C

Calcium-chlorid sprinkler equipment, comparison with dry-pipe, H. O. LACOUNT.....1708
Cole Locomotive Superheater, W. F. M. GOSS.....1468
COLLAPSING pressures of 10-inch lap welded steel tubes, effects of distortion due to retests on, R. T. STEWART.....1440
College and Apprentice Training, J. P. JACKSON..... 175
Discussion: WEBBER, W. O., 195; ALEXANDER, M. W., 293; PRITCHETT, H. S., 297; PARK, C. F., 297; BASFORD, G. M., 302; CROSS, C. W., 302; RUSSELL, W. B., 304; JACKSON, D. C., 394; HAMMERSCHLAG, A. A., 397; PORTER, H. F. J., 399; RICE, CALVIN W., 404; TOMPKINS, D. A., 406; REARICK, C. B., 409; ENNIS, W. D., 410; TAYLOR, F. W., 411; GANTT, H. L., 691; HENDRY, W. F., 692.

149183

PAGE

Combustion engine, internal evolution of, S. A. REEVE. 553
Combustion, internal, control of for gas engines, C. E. LUCKE 449
Control of Internal Combustion for Gas Engines, C. E. LUCKE. 449
Control of superheated steam, materials for, M. W. KELLOGG. 1778
Cost of Heating Storehouses, H. O. LACOUNT. 1708
CROSS, C. W., disc. College and Apprentice Training 302
CROZIER, WILLIAM, Brig. Gen., Ordnance Department as an Engineering Organization 1670
Cylinder Port Velocities, J. H. WALLACE. 141

D

Design, department of engineering, and foundry department, W. A. BOLE. . . . 21
Design of Engines for the Use of Highly Superheated Steam, M. E. R. TOLTZ . . . 63
DODGE, A. R., Specific Heat of Superheated Steam 1265
Dry-pipe sprinkler equipment, comparison with calcium chlorid, H. O. LACOUNT. 1708
Duty Test on Gas Power Plant, G. I. ALDEN and J. R. BIBBINS 477
DWYER, EMMET (with W. J. KEEP), Foundry for Bench Work 229

E

Economy of the Long Kiln, E. C. SOPER 1625
Education, see Industrial education 159
Effects of Distortion Due to Retests on Collapsing Pressures of 10-inch Lap-welded Steel Tubes, R. T. STEWART 1440
Elevators, high speed, C. R. PRATT 151
For discussions see High-speed Elevators.
ELLITHORPE, F. T., disc. High-speed Elevators 689
Engineer, mechanical, and the function of the engineering society, F. R. HUTTON 597
Engineering design, department of, and foundry department, W. A. BOLE . . 21
Engineering organization, Ordnance Department as, WM. CROZIER. 1670
Engines, air cooling of, in automobiles, J. W. WILKINSON 1592
Balancing of pumping, A. F. NAGLE 1448
Design of for use of highly superheated steam, M. E. R. TOLTZ 63
Engine, internal-combustion, evolution of, S. A. REEVE 553
ENNIS, WILLIAM D., disc. College and Apprentice Training 410
Entropy Lines of Superheated Steam, A. M. GREENE 1695
Ethics of Trade Secrets, F. P. FISH. 997
Discussion: HIBBARD, H. D. 1025
European Railway Motor Cars, B. D. GRAY. 1631
Evolution of the Internal-combustion Engine, S. A. REEVE 553
Experiences with Superheated Steam, G. H. BARRUS. 1457

F

FAY, THOMAS J., Special Auto Steel 1745
FISH, FREDERICK P., Ethics of Trade Secrets. 997

PAGE
Flow of Superheated Steam in Pipes, E. H. FOSTER 1464
FOSTER, E. H., Flow of Superheated Steam in Pipes 1464
Foundry Blower Practice, W. B. SNOW 269
Foundry for Bench Work, W. J. KEEP and EMMET DWYER 229
Foundry Cupola and Iron Mixtures, W. J. KEEP 367
Foundry Department and the Department of Engineering Design, W. A. BOLE 21
Foundry output, method of testing, R. MOLDENKE 385
Foundry, power service in, A. D. WILLIAMS 167
Friction driving, power transmission by, W. F. M. GOSS 35
Fuels, low-grade, rational utilization of, F. E. JUNGE 205
Function of the Engineering Society, mechanical engineer and the, F. R. HUTTON 597
Furnace relations, superheat and, R. P. BOLTON 1587

G

GANTT, H. L., disc. Industrial Education 690
Gas engines, control of internal combustion for, C. E. LUCKE 449
Gas, natural, test on rotary kilns burning, E. C. SOPER 1625
Gas power plant, duty test on, G. I. ALDEN and J. R. BIBBINS 477
Gas producers, see also rational utilization of low-grade fuels 205
Goss, W. F. M., Cole Locomotive Superheater 1468
Power Transmission by Friction Driving 35
GRAY, B. D., European Railway Motor Cars 1631
GREENE, ARTHUR M., Entropy Lines of Superheated Steam 1695

H

HAMMERSCHLAG, A. A., disc. College and Apprentice Training 397
HAYNES, ELWOOD, Material for Automobiles 1597
Heating storehouses, cost of, H. O. LACOUNT 1708
HENDRY, W. F., disc. College and Apprentice Training 692
HESS, HENRY, Ball Bearings 1786
HIBBARD, HENRY D., disc. Ethics of Trade Secrets 1025
High-speed Elevators, C. R. PRATT 151
Discussion: HUMPHREY, O. B., 193; PLACE, C. R., 391; MABBS, J. W., 671; NAYLOR, C. W., 679; BOLTON, R. P., 680; ORROK, G. A., 685; IHLDER, J. D., 688; ELLITHORPE, F. T., 689
HUMPHREY, O. B., disc. College and Apprentice Training 195
HUTTON, FREDERICK R., Mechanical Engineer and the Function of the Engineering Society 597

I

IHLDER, JOHN D., disc. High-speed Flevators 688
Industrial Education, W. B. RUSSELL 159
Discussion: GANTT, H. L. 690
Injector, superheated steam in, S. L. KNEASS 1455
Iron, cast, volumetric study of, H. M. LANE 467
Iron and coke, specifications for, R. MOLDENKE 385
Iron mixtures, see Foundry Cupola 367

J

PAGE
Jackson, Dugald C., disc. College and Apprentice Training 394
Jackson, John Price, College and Apprentice Training 175
Junge, F. E., Rational Utilization of Low-grade Fuels 205

K

Keep, W. J., Foundry for Bench Work (with Emmet Dwyer) 229
Foundry Cupola and Iron Mixtures 367
Kellogg, M. W., Materials for the Control of Superheated Steam 1778
Kiln, long, economy of, E. C. Soper 1625
Kneass, Strickland L., Superheated Steam in an Injector 1455

L

Lacount, H. O., Cost of Heating Storehouses 1708
Lane, H. M., Volumetric Study of Cast Iron 467
Locomotives, Superheated Steam on, H. H. Vaughan 1606
Locomotive Test, Analysis of Penna R. R.'s, at St. Louis, 1904, S. A. Reeve . 1658
Lucke, Charles E., Control of Internal Combustion for Gas Engines 449

M

Mabbs, J. W., disc. High-speed Elevators 671
Machine, Molding, Some Limitations of, E. H. Mumford 509
Machine screws, report of committee on standard proportions for 1425
Material for Automobiles, E. Haynes 1597
Materials for the Control of Superheated Steam, M. W. Kellogg 1778
Mechanical Engineer and the Function of the Engineering Society, F. R. Hutton 597
Moldenke, R., Specifications for Iron and Coke and Method of Testing Foundry Output 385
Molding machine, some limitations of, E. H. Mumford 509
Molding sand, improvement of by mechanical treatment, A. E. Outerbridge, Jr 131
Motor cars, European railway, B. D. Gray 1631
Mumford, E. H., Some Limitations of the Molding Machine 509

N

Nagle, A. F., Balancing of Pumping Engines 1448
Naylor, C. W., disc. High-speed Elevators 679

O

Ordnance Department as an Engineering Organization, Wm. Crozier 1670
Organization, engineering, Ordnance Department as, Wm. Crozier 1670
Orrok, G. A., disc. High-speed Elevators 685
Outerbridge, Alexander E., Jr., Molding Sand 131

P

PAGE
PARKE, C. F., disc. College and Apprentice Training, ... 297
Patterns for Repetition Work, E. H. BERRY 235
PLACE, CLYDE R., disc. High-speed Elevators 391
Port velocities, see Cylinder Port Velocities 141
PORTER, H. F. J., disc. College and Apprentice Training 399
Power plant, gas, duty test on, G. I. ALDEN and J. R. BIBBINS 477
Power Service in the Foundry, A. D. WILLIAMS 167
Power Transmission by Friction Driving, W. F. M. GOSS 35
PRATT, CHARLES R., High-speed Elevators 151
Pressures of Lap-welded Steel Tubes, R. T. STEWART 1440
PRITCHETT, HENRY S., disc. College and Apprentice Training 297
Pumping engines, balancing of, A. F. NAGLE 1448

R

Railway Motor Cars, European, B. D. GRAY 1631
Rational Utilization of Low-grade Fuels, F. E. JUNGE 205
REARICK, C. B., disc. College and Apprentice Training 409
REEVE, SIDNEY A., Analysis of Locomotive Test 1658
Evolution of Internal-combustion Engine 553
Refrigerating machines, report of committee on 1249
Repetition work, patterns for, E. H. BERRY 235
Report of Committee on Refrigerating Machines 1249
Report of Committee on Standard Proportions for Machine Screws 1425
RICE, CALVIN W., disc. College and Apprentice Training 404
RUSSELL, W. B., Industrial Education 159
disc. College and Apprentice Training 304

S

Sand, see Molding Sand 131
SNOW, W. B., Foundry Blower Practice 269
Some Limitations of the Molding Machine, E. H. MUMFORD 509
SOPER, E. C., Economy of the Long Kiln 1625
Special Auto Steel, T. J. FAY 1745
Specific Heat of Superheated Steam, A. R. DODGE 1265
Discussion: STOVEL, R. W. 1473
Specific Heat of Superheated Steam, C. C. THOMAS 633
Specifications for Iron and Coke and Method of Testing Foundry Output, R. MOLDENKE 385
Sprinkler equipments, comparison of dry-pipe and calcium-chlorid, H. O. LACOUNT 1708
Steel, special auto, T. J. FAY 1745
Steel tubes, pressures of lap-welded, R. T. STEWART 1440
STEWART, REID T., Pressures of Lap-welded Steel Tubes 1440
Storehouses, cost of heating, H. O. LACOUNT 1708
STOVEL, R. W., disc. Specific Heat of Superheated Steam 1473

PAGE

Student engineering courses in the industries, relation of, to the college technical courses, J. P. JACKSON 175
For discussion see College and Apprentice Training.
Superheat and Furnace Relations, R. P. BOLTON 1587
Superheated steam, design of engines for the use of, M. E. R. TOLTZ 63
Entropy lines of, A. M. GREENE 1695
Experiences with, G. H. BARRUS 1457
Flow of, in pipes, E. H. FOSTER 1464
In an Injector, S. L. KNEASS 1455
On Locomotives, H. H. VAUGHAN 1606
Materials for control of, M. W. KELLOGG 1778
Specific heat of, A. R. DODGE 1265
Specific heat of, C. C. THOMAS 633
Superheater, performance of Cole, applied to locomotive, W. F. M. Goss 1468

T

TAYLOR, FRED W., disc. College and Apprentice Training 411
Test of Penna R. R.'s locomotive, St. Louis, 1904, analysis of, S. A. REEVE . . 1658
Test on rotary kilns burning natural gas, E. C. SOPER 1625
Testing foundry output, method of, R. MOLDENKE 385
THOMAS, CARL C., Specific Heat of Superheated Steam 633
TOLTZ, MAX E. R., Design of Engines for the Use of Highly Superheated Steam 63
TOMPKINS, D. A., disc. College and Apprentice Training 406
Trade secrets, ethics of, F. P. FISH 997
Transmission, power, by friction driving, W. F. M. Goss 35

U

Use of Superheated Steam on Locomotives in the United States and Canada, H. H. VAUGHAN 1606
Utilization, rational, of low-grade fuels, F. E. JUNGE 205

V

VAUGHAN, H. H., Superheated Steam on Locomotives 1606
Velocities, see Cylinder port velocities 141
Volumetric Study of Cast Iron, H. M. LANE 467

W

WALLACE, JACOB H., Cylinder Port Velocities 141
WEBBER, W. O., disc. College and Apprentice Training 195
Weight of plungers of a vertical, triple-expansion, crank and flywheel pumping engine, an investigation, A. F. NAGLE 1448
WILKINSON, JOHN, Air Cooling of Automobile Engines 1592
WILLIAMS, A. D., Power Service in the Foundry 167
